

Amendments to and Listing of the Claims:

Please amend claims 21, 26, 31, 36, and 54 as follows:

1 -20. (cancelled).

21. (currently amended) A method of accessing a picture file received from a cellular telephone, said method comprising the steps of:

receiving said picture file at said cellular telephone;

simultaneously displaying a plurality of picture files on a display of said cellular telephone;

enabling a first user to change information displayed with said received picture file by way of a user interface on said cellular telephone;

providing a separate selection option for each picture file of said plurality of picture files when said plurality of picture files is displayed on said cellular telephone;

enabling the first user to separately select a selection option for each picture file of said plurality of picture files;

displaying a subset of said plurality of picture files on said display according to a selected display function, said subset comprising picture files selected by way of said selection options associated with said plurality of picture files;

enabling access by said first user, remote from said cellular telephone by way of a webpage ~~provided~~ hosted by a wireless service provider for said cellular telephone, to said plurality of picture files and said information which has been changed; and

enabling a second user to separately select a selection option associated with each picture file of said plurality of picture files displayed on said webpage by way of said webpage.

22. (previously presented) The method of claim 21 wherein said step of receiving said picture file at said cellular telephone comprises receiving said picture file by way of a wireless link of a telecommunications network.

23. (previously presented) The method of claim 21 wherein said step of receiving said picture file at said cellular telephone comprises receiving said picture file as a attachment to an email.

24. (previously presented) The method of claim 21 further comprising a step of storing said picture file on said cellular telephone.

25. (previously presented) The method of claim 21 wherein said step of providing a selection option comprises providing a selection box associated with said picture file which can be selected by a user.

26. (currently amended) A method of accessing a picture file received from a cellular telephone, said method comprising the steps of:

storing a plurality of picture files on said cellular telephone;

simultaneously displaying said plurality of picture files on a display of said cellular telephone;

enabling a first user to change information displayed with a picture file of said plurality of picture files by way of a user interface on said cellular telephone;

providing a separate selection option for each picture file of said plurality of picture files displayed on a display of said cellular telephone;

enabling the first user to separately select a selection option for each picture file of said plurality of picture files displayed on said cellular telephone;

displaying a subset of said plurality of picture files on said display according to a selected display function, said subset comprising picture files selected by way of said selection options associated with said plurality of picture files;

enabling access by said first user, remote from said cellular telephone by way of a webpage ~~provided~~ hosted by a wireless service provider for said cellular telephone, to said plurality of picture files and said information which has been changed; and

enabling a second user to separately select a selection option associated with each picture file of said plurality of picture files displayed on said webpage by way of said webpage.

27. (previously presented) The method of claim 26 further comprising a step of receiving said at least one picture file by way of a wireless link of a telecommunications network.

28. (previously presented) The method of claim 27 wherein said step of receiving a picture file by way of a wireless link of a telecommunications network comprises receiving said picture file as an attachment to an email.

29. (previously presented) The method of claim 26 wherein said step of enabling a user to separately select said selection option for each picture file of said plurality of picture files displayed on said cellular telephone further comprises a step of enabling a user to select a function for presenting said picture file.

30. (previously presented) The method of claim 26 further comprising a step of enabling said user to enlarge said picture file.

31. (currently amended) A method of accessing a picture file received from a cellular telephone, said method comprising the steps of:

simultaneously displaying a plurality of picture files on a cellular telephone;

enabling a first user to change information displayed with a predetermined picture file of said plurality of picture files by way of said user interface on said cellular telephone;

providing a separate selection option for each picture file of said plurality of picture files when said plurality of picture files is displayed on said cellular telephone;

enabling the first user to separately designate a selection option for each picture file of said plurality of picture files;

enabling a user to enlarge a picture file of said plurality of picture files;

displaying a subset of said plurality of picture files on said display according to a selected display function, said subset comprising picture files selected by way of said selection options associated with said plurality of picture files;

enabling access by said first user, remote from said cellular telephone by way of a webpage ~~provided~~ hosted by a wireless service provider for said cellular telephone, to said plurality of picture files and said information which has been changed; and

enabling a second user to select which picture files of said plurality of picture files are displayed on said webpage by way of said webpage.

32. (previously presented) The method of claim 31 wherein said step of displaying a picture file on a cellular telephone comprises displaying a thumbnail of said picture file.

33. (previously presented) The method of claim 32 wherein said step of enlarging said picture file comprises a step of displaying said picture file as a window on a display of said cellular telephone.

34. (previously presented) The method of claim 31 further comprising a step of enabling the selection of said picture file by enabling a user to select a selection box to indicate that a selection has been made.

35. (previously presented) The method of claim 31 further comprising a step of presenting said picture file having a designated selection option according to a user selectable function.

36. (currently amended) A method of accessing a picture file received from a cellular telephone, said method comprising the steps of:

storing a plurality of picture files on said cellular telephone;

simultaneously displaying said plurality of picture files as thumbnails on said cellular telephone;

enabling a first user to change information displayed with a picture file of said plurality of picture files by way of a user interface on a cellular telephone;

providing a plurality of selection options, each said selection option being associated with a picture file of said plurality of picture files;

enabling the first user to separately designate each said selection option associated with said plurality of picture files;

displaying a subset of said plurality of picture files on said display according to a selected display function, said subset comprising picture files selected by way of said selection options associated with said plurality of picture files;

enabling access by said first user, remote from said cellular telephone, by way of a webpage ~~provided~~hosted by a wireless service provider for said cellular telephone, to said plurality of picture files and said information which has been changed; and

enabling a second user to select which picture files of said plurality of picture files are displayed on said webpage by way of said webpage.

37. (previously presented) The method of claim 36 further comprising a step of receiving at least one picture file of said plurality of picture files by way of a wireless link of a telecommunications network.

38. (previously presented) The method of claim 37 further comprising a step of enabling the selection of a picture file of said plurality of picture files by enabling a user to select a selection box to indicate that a selection has been made.

39. (previously presented) The method of claim 38 further comprising a step of enabling the enlargement of a picture file displayed during said step of displaying said subset of said plurality of picture files.

40. (previously presented) The method of claim 39 wherein said step of enabling a user to designate each said selection option associated with said plurality of picture files comprises a step of enabling a user to designate a selection box to select a display feature.

41 – 49 (cancelled)

50. (previously presented) The method of claim 21, wherein the first user and the second user are the same person.

51. (previously presented) The method of claim 26, wherein the first user and the second user are the same person.

52. (previously presented) The method of claim 31, wherein the first user and the second user are the same person.

53. (previously presented) The method of claim 36, wherein the first user and the second user are the same person.

54. (currently amended) A method of viewing a picture file, the method comprising:

- (a) storing a plurality of picture files on a cellular telephone;
- (b) simultaneously displaying the plurality of picture files on a display of the cellular telephone;
- (c) enabling a user to edit information associated with at least one of the plurality of picture files;
- (d) enabling access to the plurality of picture files via a website ~~provided~~hosted by a wireless service provider, wherein the wireless service provider provides services for the cellular phone;
- (e) enabling the user to edit information associated with at least one of the plurality of picture files via the website; and
- (f) displaying at least one of the plurality of picture files on the cellular phone with the information edited in step (e).

55. (previously presented) The method of claim 54, further comprising receiving at least one of the plurality of picture files by way of a wireless link of a telecommunications network.

56. (previously presented) The method of claim 54, further comprising enabling the enlargement of a picture file displayed during said step of displaying.
